Tableau Assignment

You will create four different tableaus and present them in a digital format. You may choose to do this assignment on your own or with classmates or family members.

- Tableaus are created from a series of still shots where each shot moves the story forward. This means you need to take more than one picture for each scene so that the viewer can see the story progress.
- You will take multiple photos of each scene and create a slideshow or video clip.
- Remember there is no movement or talking in a tableau. You may choose to add background music to your finished product, but now sound effects.
- You must be in the tableau in some way.
- Choose from the scenes below or come up with your own scene ideas.
    - A day at the beach
    - Stressed out students studying for a test
    - Shopping for groceries
    - Riding a giant roller coaster
    - A daycare teacher losing control of her toddlers
    - The final pose of a big Broadway dance number
    - Learning to ice skate
    - Saving someone from falling into a pit
    - A herd of elephants taking a walk
    - The sound of silence
    - Walking home in a blizzard
